RADIO NEWS INDEX

VOLUME XVI — July, 1934 — NUMBER 1

Holiday Listeners — *William C. Gittinger* — Page 8
Portable Radio for Car or Boat — *By the Staff* — Page 10
110-Volt A.C. Supply Unit — *Nat Pomeranz* — Page 12
Fifteenth Anniversary Radio News — *Historic Resume* — Page 13
World Distance Map (Eastern U. S.) — *By the Staff* — Page 19
Listening to Byrd — *Samuel Kaufman* — Page 20
How to Build a 2-Tube Short-Wave Set — *Harry D. Hooten* — Page 23
Getting Acquainted with Short Waves (Part Seven) — *James Millen* — Page 24
A 2-Stage T.R.F. Preselector — *B. J. Montyn* — Page 26
Latest All-Wave and Short-Wave Receivers — *Wm. C. Dorf* — Page 27
Practical Amateur Aerial Design — *A. H. Lynch and E. Glaser* — Page 28
Phenomena Underlying Radio (Part Eight) — *E. B. Kirk* — Page 30
Data on the 6C6-6D6 Tubes — *J. van Lienden* — Page 31
Radio News Portable Tube Checker — *John H. Potts* — Page 32
Station List—Europe — *By the Staff* — Page 36

VOLUME XVI — August, 1934 — NUMBER 2

Big New Things in Radio — *Wm. C. Dorf* — Page 72
If Not "Television" Why Not "Facsimile" — *Laurence M. Cockaday* — Page 76
Radio News Universal Multimeter (Part One) — *John H. Potts* — Page 78
Electronics in Checking Timepieces — *Frederic Siemens* — Page 80
A Combination Hearing-Aid Radio — *Samuel B. Simer* — Page 81
Notes on R.F. Amplifiers (Part Three) — *Edward M. Glaser* — Page 83
S.W. Station List (Part One) — *By the Staff* — Page 85
World Distance Map (West Coast) — *E. J. Quinby* — Page 91
A Compact S. W. Receiver — *Technical Editor* — Page 93
How to Build the Radio News "Dragnet" — *S. Gordon Taylor* — Page 94
Getting Acquainted with Short Waves (Part Eight) — *James Millen* — Page 96
Rating Tests on Receivers — *J. W. Fulmer* — Page 98
Making Any Set "All Wave" — *Technical Staff* — Page 98
Two New S.W. Sets — *By the Staff* — Page 99
All-Wave Set Design (Part One) — *McMurdo Silver* — Page 100
A Visual Volume Control — *Samuel Kaufman* — Page 102
A Remote Control Receiver — *Technical Staff* — Page 116

VOLUME XVI — September, 1934 — NUMBER 3

The First Telecommunication Convention — *Gerald C. Gross* — Page 136
World Distance Map (Europe) — *John Borst* — Page 144
Short Wave Station List (Part Two) — *By the Staff* — Page 145
The "All Star" All Wave Receiver — *Laurence M. Cockaday* — Page 146
The "Double-Doublet" Antenna — *W. H. Bohlke* — Page 148
A Scouts "Own" S.W. Set — *Laurence M. Cockaday* — Page 150
All-Wave Set Design (Part Two) — *McMurdo Silver* — Page 153
Tiny Transceivers in 5-meter Tests — *S. Gordon Taylor* — Page 154
Antenna and Feeder Design (Part One) — *Verne V. Gunsolley* — Page 156
Phenomena Underlying Radio (Part Nine) — *E. B. Kirk* — Page 157
A Powerful 30-Watt P. O. System — *W. F. Marsh* — Page 160
New Things in Radio — *Wm. C. Dorf* — Page 161
Radio News Universal Multimeter (Part Two) — *John H. Potts* — Page 162
A Point-to-Point Analyzer — *Emile Milles* — Page 164
Data on the Type 18 Tube — *J. van Lienden* — Page 166

VOLUME XVI — October, 1934 — NUMBER 4

"Our Own" Radio Show — *Technical Staff* — Page 200
A 12.8-550 Meter Superheterodyne — *McMurdo Silver* — Page 205
A High-Fidelity "LAB" Amplifier — *J. M. Hollywood and M. P. Wilder* — Page 206
History and Analysis of Receiver Controls — *Paul G. Andres* — Page 208
A New "All-Method" Analyzer — *John H. Potts* — Page 210
Some Practical "Band Spread" Methods — *Alonzo Wierenga* — Page 212
The "Ham" Shack — *Everett M. Walker* — Page 214
Antenna and Feeder Design (Part Two) — *Verne Gunsolley* — Page 215
A Compact Amateur 5-Meter Transceiver — *Edward M. Glaser* — Page 217
French Broadcasting — *Kurt Lang* — Page 219
How to Build an A.C.-D.C. Midget — *George Day* — Page 222
World Distance Map (South American) — *John M. Borst* — Page 230
Short-Wave Station List (Part Three) — *By the Staff* — Page 231
The German Short-Wave Transmissions — *W. W. Diefenbach* — Page 232
Operating Data on the "All-Star" Receiver — *Laurence M. Cockaday* — Page 235
A New 3-Band "Super" — *Technical Editor* — Page 236

VOLUME XVI — November, 1934 — NUMBER 5

Fliers! Here's How — *Charles E. Planck* — Page 272
The Radio Man Who Directs Aerial Traffic — *Gilbert Princell* — Page 273
Exploring the Playground of Radio Waves — *Samuel Kaufman* — Page 275
A 100-2100 KC. Signal Generator — *S. Egert and S. Bagno* — Page 278
British Lilliput Tubes — *R. W. Hallows* — Page 279
First Aid to Inventors — *E. E. Free, Ph.D.* — Page 280
A High-Fidelity Laboratory Amplifier (Part Two) — *J. M. Hollywood and M. P. Wilder* — Page 282
Some New and Useful Switches — *Paul G. Andres* — Page 285
A New S.W. Converter — *By the Staff* — Page 295
Build this "Skyscraper" S.W. Receiver — *D. Pollack and S. G. Taylor* — Page 296
A 9-240-9-2400-Meter Superheterodyne — *By the Staff* — Page 299
A New 6-Tube All-Wave Super — *John Strong* — Page 300
Short-Wave and Aviation Station Lists (Part Four) — *By the Staff* — Page 301
A 12.8-550 Meter Superheterodyne (Part Two) — *McMurdo Silver* — Page 302

VOLUME XVI — December, 1934 — NUMBER 6

First Aid to Inventors (Part Two) — *E. E. Free, Ph.D.* — Page 336
Education for "Making a Living in Radio" (Part One) — *Zeh Bouck* — Page 338
Radio in Aircraft (Part One) — *Henry W. Roberts* — Page 340
Analyzer Modernizing — *E. J. Sampson* — Page 342
A High-Fidelity Laboratory Amplifier (Part Three) — *S. Gordon Taylor* — Page 344
A Push-Pull Amplifier — *Hubert Shortt* — Page 346
Antenna Mechanics — *Ray Hawksley* — Page 348
Locations of Short-Wave Stations (Including Frequency and Wavelength) — *By the Staff* — Page 356
Testing an All-Wave "Super" — *By the Staff* — Page 358
Short-Wave Station List (Police and Television Stations) — *By the Staff* — Page 359
The "Skyscraper" 3-Tube S.W. Set (Part Two) — *D. Pollack and S. G. Taylor* — Page 360

RADIO NEWS INDEX

(Departments not included)

VOLUME XVI — January, 1935 — NUMBER 7

		PAGE
The Future of Short Waves	*Leading Authorities*	400
Television and Facsimile in 1935	*Television Experts*	402
The "Skyscraper" Universal Power Pack	*D. Pollack and S. G. Taylor*	403
First Aid to Inventors (Part Three)	*E. E. Free*	404
World Distance Map (Australia)	*John M. Borst*	413
A Skip-Band "Superhet"	*Robert Hertzberg*	416
Education for "Making a Living in Radio" (Part Two)	*Zeh Bouck*	418
Short-Wave Marine Radio	*Frederick Siemens*	420
An "Acorn" Tube	*A. Fenderson*	420
Radio in Aircraft (Part Two)	*Henry W. Roberts*	422
Ohmmeter Design (Part One)	*Alfred R. Gray*	424

VOLUME XVI — February, 1935 — NUMBER 8

How to Build a Simple Electronic Alarm	*John D. Reid*	466
The New Priess Television Scanner	*Elmore B. Lyford*	467
Broadcast Stations in the U. S.	*John M. Borst*	474
Verifying DX Reception	*Robert Hertzberg*	476
Sunset to Sunrise with Foreign DX (Part One)	*R. H. Tomlinson*	477
Variable I.F. Coupling	*A. A. Webster*	479
Ohmmeter Design (Part Two)	*Alfred R. Gray*	480
An All-Wave Signal Generator (No. 4 in the Series)	*John H. Potts*	482
Choosing Sensitivity and Volume Controls	*L. A. de Rosa*	484
First Aid to Inventors (Part Four)	*E. E. Free*	485
Radio in Aircraft (Part Four)	*Henry W. Roberts*	487
A New Rack-and-Panel Amplifier (Kenyon—Part One)	*B. J. Montyn*	488
Building a Slide-Wire Bridge	*Gerard J. Kelley*	489
Tests on 16-Tube "Super" (Midwest)	*By the Staff*	501
Making Plans for a Short-Wave Converter	*S. Gordon Taylor*	502

VOLUME XVI — March, 1935 — NUMBER 9

Home-Built "High-Fidelity" Receiver	*John M. Borst*	536
How to Build the Browning '35 (Part One)	*Glenn H. Browning*	538
Designing Saturable Reactors	*Myron J. Brown*	540
The "All-Star" Junior All-Wave Receiver	*Laurence M. Cockaday*	542
Experiments with Multiple Regeneration	*J. Plebanski*	544
13-550 Meter Superheterodyne Receiver (Scott XV)	*S. Gordon Taylor*	547
Short-Wave Converter Design	*S. Gordon Taylor*	549
Improving Your Regenerative Receiver	*Robert Hertzberg*	549
A New Rack-and-Panel Amplifier (Kenyon—Part Two)	*B. J. Montyn*	557
First Aid to Inventors (Part Five)	*E. E. Free*	558
An All-Wave Signal Generator (Part Two)	*John H. Potts*	560
Radio in Aircraft (Part Four)	*Henry W. Roberts*	562
Sunset to Sunrise with Foreign DX (Part Two)	*R. H. Tomlinson*	563

VOLUME XVI — April, 1935 — NUMBER 10

The Future of Short-Wave Reception (Part One)	*Charles A. Morrison*	598
The "Radio News" S. W. Converter (Part One)	*S. Gordon Taylor*	600
A Modern "Ham" Receiver (Super Skyrider)	*By the Staff*	603
How to Build the Browning '35 (Part Two)	*Glenn H. Browning*	604
Single-Tube A.C.-D.C. Receiver	*Richard Feeney*	606
S. W. Station Identification Chart	*By the Staff*	607
Wavelength-Frequency Conversion Chart	*By the Staff*	613
World Distance Map (South Africa)	*John M. Borst*	614
Testing the "All-Star" Junior	*By the Editor*	615
A New Double-Doublet Antenna	*By the Staff*	615
How I Won the Denton Trophy	*H. S. Bradley*	616
World Time Conversion Chart	*The Technical Editor*	617
Short-Wave Design Calculations	*Ralph R. Batcher*	618
High-Fidelity (Adjustable)	*I. A. Mitchell*	621
First Aid to Inventors (Part Six)	*E. E. Free*	622
U. S. Radio Time Signals	*Robert Hertzberg*	627
A New 4-Band Superheterodyne (General Electric Mod. 81)	*By the Staff*	627
Profits in Group Hearing Aids	*Charles A. and Paul Bottorff*	628

VOLUME XVI — May, 1935 — NUMBER 11

1935-1936 Automobile Radios	*Robert Hertzberg and W. C. Dorf*	662
High-Range V. T. Voltmeter	*William R. Harry*	664
High-Fidelity Pre-Amplifier	*S. Ruttenberg*	667
Tests of Modern "Ham" Receiver (Super Skyrider)	*By the Staff*	668
The Acorn Tube on ¾ Meter (Part One)	*Ed Glaser*	669
Using the Cathode-Ray Oscillograph (Part One)	*Kendall Clough*	670
Combination Service Meter	*L. R. Goetz*	671
Calculating Power Output of Tubes	*C. A. Johnson*	672
Radio in Aircraft (Part Five)	*Henry W. Roberts*	673
The Future of S.W. Reception (Part Two)	*Charles A. Morrison*	674
The Radio News S.W. Converter (Part Two)	*S. Gordon Taylor*	675
U. S. and World Mileage Chart	*John M. Borst*	677
World Alphabets	*C. C. Clark, Ph.D.*	683
How to Build the Browning '35 (Part Three)	*Glenn H. Browning*	684
S. W. Station Identification Chart (Part Two)	*By the Staff*	687
Build a Remote Control Tuner	*Richard F. Shea*	691
Broadcast Stations in N. and S. Americas	*By the Staff*	692

VOLUME XVI — June, 1935 — NUMBER 12

New Receivers for Summer Radio	*W. C. Dorf and R. Hertzberg*	726
British Television	*Samuel Kaufman*	728
The New Metal Tubes	*John M. Borst*	729
Tri-Band Short-Wave Receiver	*Harry D. Hooton*	730
The Acorn Tube on ¾ Meter (Part Two)	*Ed Glaser*	733
Design of Crystal Band Filters (Part One)	*W. W. Waltz*	734
New D.C. Photocell Amplifier	*By the Staff*	736
Home Built A.C. Pre-Amplifier	*Walter Widlar*	737
Voltage-Divider Calculations	*Walther Richter*	738
All-Purpose Service Tester	*Floyd Fawcett*	739
Calculating Power Output of Tubes (Part Two)	*C. A. Johnson*	740
The Oscillator in Servicing	*O. J. Morelock Jr.*	741
"Perpetual" Tube Checker (Part One)	*Verne V. Gunsolley*	742
Using the Cathode-Ray Oscillograph (Part Two)	*Kendall Clough*	744
The Future of S.W. Reception (Part Three)	*Charles A. Morrison*	745
World Distance Map (South America)	*John M. Borst*	751
The Radio News S.W. Converter (Part Three)	*S. Gordon Taylor*	753
Testing the Browning '35	*By the Editor*	754
Station List—Europe (Broadcast Band)	*By the Staff*	755
